Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission’s burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

If the Commission requests respondents to submit information which respondents believe are confidential, respondents may request confidential treatment of such information under 47 CFR 0.459 of the Commission's rules.

**Needs and Uses:** The Commission has developed standardized Tariff Review Plans (TRPs) that set forth the summary material that incumbent LECs (ILECs) file to support revisions to the rates in their interstate access service tariffs. The TRPs display basic data on rate development in a consistent manner, thereby facilitating review of the ILEC rate revisions by the Commission and interested parties. The TRPs have served this purpose effectively in past years.

On April 20, 2017, the Commission adopted the *Business Data Services Order*, FCC 17-43, reforming the business data services/special access regulations for incumbent and competitive LECs by detariffing certain business data services and modifying the regulatory obligations for those business data

services that will remain tariffed. Additionally, the *Business Data Services Order* adopted an X-factor of two percent and required price cap ILECs to make a one-time filing to revise their TRPs to implement the new X-factor to become effective on December 1, 2017. In particular, the Commission amended section 61.45(b)(1)(iv) of its rules to state that the X-factor shall equal 2 percent effective December 1, 2017. To ease the burden on industry, the only factor that changes in the revised TRPs is the X-factor. Base period demand and the value of GDP-PI will stay constant for this particular filing.
